

OSA 5312-63

MEMORANDUM FOR: Acting Assistant Director, OSA

SUBJECT : Proposed Use of OSA Communications Facilities by OSI

REFERENCES : A. Memo for C/COMMO/OSA from AAD/OSA, dated 15 October 1963; Subject: Proposed Use of OSA Communications Facilities by OSI (OSA 5381-63)

B. Memo for AD/OSA from AD/OSI, dated 8 May 1963; Subject: Request for OSI Use of DD/S&T/OSA Communications Facilities (OSA 5376-63)

1. Our reactions to the OSI request to use OSA communications facilities are listed below:

A. OSA Communications Division can accommodate OSI's request for communications to the

B. Existing CIA communications facilities with the [REDACTED] can be adapted to provide the requested communications at a minimal cost that is not considered worth recovering - approximately the cost of making five long-distance telephone calls to [REDACTED] each week.

C. There are no communications security objections to the proposal.

2. As indicated above, OSI's current requirement can be absorbed without undue effort. We also agree each request to expand our communications facilities to accommodate other components in DD/S&T should be carefully considered. While the OSA communications facilities have

an obligation to handle all types of reconnaissance projects' traffic, our prime objective in providing the fastest and most secure facilities possible for operational missions should not be jeopardized thereby. We do not believe this constitutes a problem at this time due to its limited utilization by other components of DD/S&T.
